

Lumen® Cloud Connect Dynamic Connections IP VPN

Add, remove or modify cloud connections in real time.

Lumen® Cloud Connect Dynamic Connections IP VPN gives you the power to create and delete private data connections in real time on our secure, redundant and global network. Manage your entire network with the self-service portal to connect cloud environments so that headquarters, branches and data centers share a single private connection. Purchase only what you need with our pay-as-you-go hourly or monthly billing model and maintain compliance requirements with continuous monitoring and embedded security.*

Digital agility

- Deliver applications where they are most valuable by creating, removing or modifying connections in real time.
- Meet fluctuating customer requirements with on-demand, software-defined circuit creation regardless of location.
- Scale data for your entire WAN on the fly.

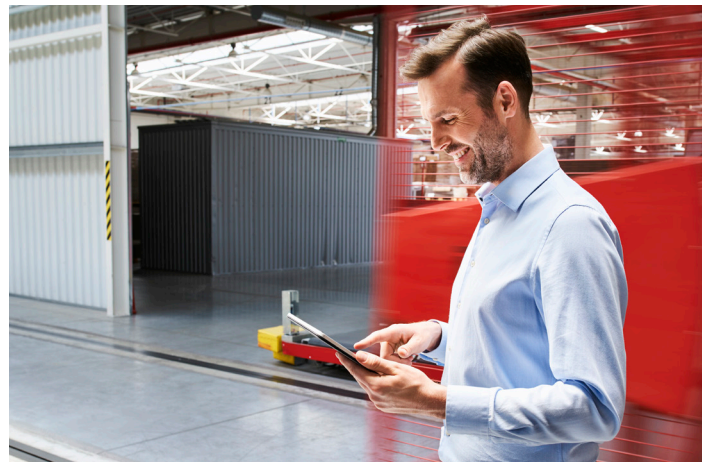

Enhanced experience

- Quickly make connections with no new interface to learn using our intuitive, familiar experience model.
- Dynamically optimize application performance based on location, bandwidth, customer demands, latency, scheduling, replication and storage requirements.

Greater control

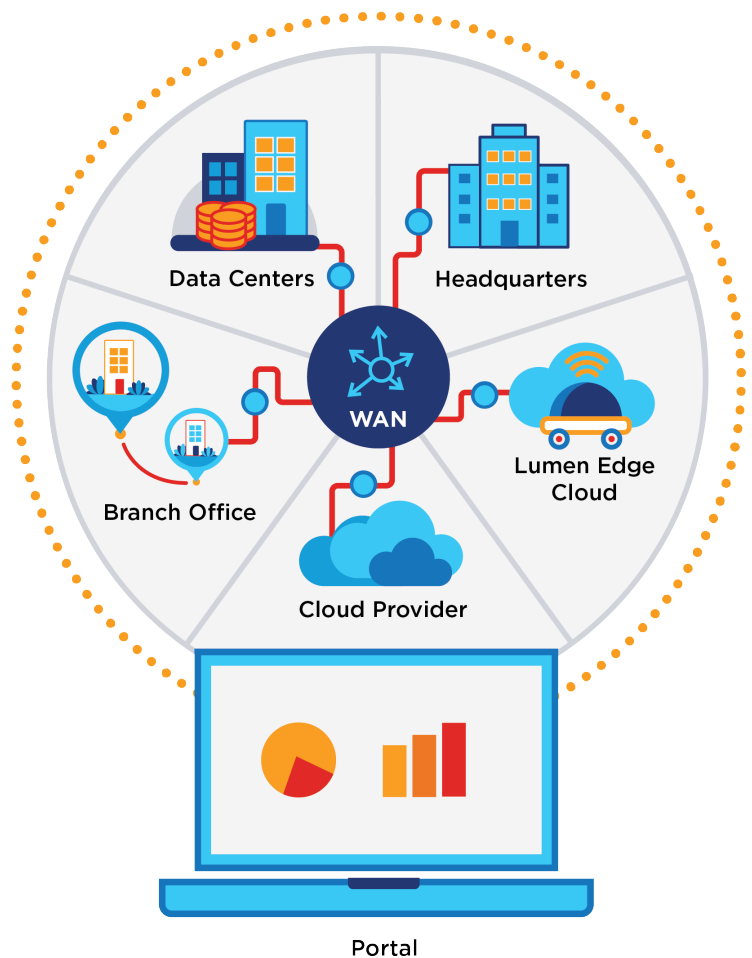

- Gain control and flexibility over budgets with our pay-as-you-go hourly or monthly billing model.
- Stay ahead of ever-shifting physical locations required for data and applications by making changes from a single portal across the entire WAN.

Create connections in minutes, not months, with the new, simplified self-service Lumen® Control Center. Design, price and purchase solutions as you need when you want.

Features and Specs

- Quote, configure, order and deliver connectivity through the Lumen Control Center portal.
- Connect entire WAN via single Lumen® Cloud Connect Dynamic Connections IP VPN.
- Link private network to CSPs allowing HQs, branches, and data centers to share a single private connection .
- View utilization stats, actionable insights and increased linkage to ticketing systems in the portal.
- Reduce stand-up time with pre-loaded WAN information.
- Enhance Lumen Edge solutions by increasing network flexibility to increase application performance and security.
- Maintain compliance and security via our inherently private network.
- Leverage the click-to-chat functionality within the portal, or contact your account team for demos and questions.
- Confidently support availability and packet delivery with our private network SLA.

*A Lumen master services agreement for network services with minimum term and early termination fees is required to gain access to Lumen® Cloud Connect Dynamic Connections IP VPN.

Why Lumen?

Lumen delivers a highly secure and globally connected network platform with the convenience to order Lumen® Cloud Connect Dynamic Connections IP VPN as you choose. Manage secure, reliable, high-performance, scalable, private any-to-any/point-to-point WAN connectivity on demand and spend less time managing traffic and more time focusing on your business.
