

How ethernet fuels digital business.

Leading digital businesses know that getting the edge on competition means transforming WAN networks to support their business initiatives. Ethernet is a critical component of any adaptive network. Ethernet is private and secure, supports real-time applications, real-time cloud connectivity and dynamic bandwidth scaling up to 3x, giving you the agility you need to succeed.

Improvements among firms that deploy Ethernet-WAN and track business and networking KPIs:

on-demand bandwidth scalability

Improved networking costs

revenue growth

speed of application deployment¹

Built to deliver virtually everywhere.

Scalable

Get the bandwidth you need with access options from 2 Mbps up to 6 Gbps.²

Secure

Seamlessly connect your enterprise across a dedicated, private network.

Customizable

Leverage a built-to-last solution that can be expanded and amended as business evolves.

Scalable

Link disparate sites, data centers and remote employees with point-to-point, point-to-multipoint connectivity or multipoint-to-multipoint connectivity.

LumenSM ethernet services

Global reach
in North America, Europe and Asia Pacific

#1 U.S. carrier
Ethernet Services Provider by Vertical Systems Group

Service SLA availability of **99.999%**³

Discover new levels of visibility, agility and control with LumenSM software-defined network solutions.

Dynamically flex bandwidth up to 3x to accommodate peak traffic requirements.

Provision connections between data centers and cloud providers in real-time.

Control costs with unlimited scheduled, automated or ad-hoc adjustments.⁴

Leverage real-time, 24/7 network performance visibility with LumenSM Enhanced Management.

Future-proof your WAN with our award-winning ethernet services.

¹ IDG Research, Adaptive Networking Marketpulse Survey, Jan. 2019.

² 4-6 Gbps speeds subject to availability.

³ In the event that service becomes unavailable for reasons other than an excused outage, customer will be entitled to a service credit off of the MRC for the affected service based on the cumulative unavailability of the service in a given calendar month. Applies to protected Ethernet services within North America (on and off-net) and Europe (on-net) only. Actual customer experience may vary.

⁴ Automated events-based changes require use of both LumenSM Enhanced Management and LumenSM Dynamic Capacity.
