

LumenSM & Avaya[®]

Enhance business capabilities and maximize budgets.

Lumen is a global network provider that delivers end-to-end solutions for your company's voice and data networking needs. We provide unified communications, security, data center, cloud, optical networking, telepresence and wireless services. We collaborate with leading technology providers in both hardware and services to help ensure your business communications needs are met. For state-of-the-art secure networking capabilities, we work with Avaya Networks as an Avaya Connect Platinum Partner to provide cost effective, resilient networking and unified communications solutions.

Avaya

Avaya is changing the way you work by integrating communications tasks currently performed with separate tools. Built on the powerful voice capabilities of the Avaya Aura Architecture, Avaya provides instant messaging, video conferencing, advanced mobility, presence, contact center, collaboration and video capabilities. Avaya's systems are built for IP and are designed for you, the end user, by bringing multi-media communications, enterprise applications and personal information together into one seamless integrated environment—all with little burden on your IT resources.

- Easy on IT resources with customized IP architecture
- 99.999% availability for 100% peace of mind with distributed architecture and applications

AVAYA

Avaya and Lumen can create a unique IP solution built from the ground up for your business. Ask us how to get started today.

Lumen

Complete solutions

Our design, installation and maintenance services are available to solve your business networking and communications needs; we provide an exceptional standard of service for your business voice and data needs.

Nationwide network

We have one of the largest fiber footprints in the U.S., capable of supporting 2.5Gbps (OC-48), 10Gbps (OC-192) and 40Gbps (OC-768) transmission rates.

Financing

We offer multiple financing options for your convenience.

Commitment

We partner with best-in-class equipment providers for customized business voice and data solutions; we also employ highly-skilled engineers who are trained to operate our state-of-the-art equipment.
